

Bug ID	Title	Difficulty	Status	Reproduction Steps	Assigned To	Reporting Date	Fix Date	Expected Outcome	Actual Outcome
BUG-001	Linux Setup Failure in Project Environment	High	Fixed	1. Clone the project on a Linux machine. 2. Run backend and Firebase initialization scripts. 3. Observe startup logs.	Obidit	8th December 2025	10th December 2025	Project setup should run consistently across supported operating systems	Linux startup failed due to OS-specific path handling and script assumptions.
BUG-002	Authentication Token Validation Failure After Login	High	Fixed	1. Sign in with valid credentials. 2. Navigate to a protected page. 3. Trigger an authenticated API call.	Maisha	11th December 2025	13th December 2025	Authenticated users should receive and use a valid token for protected routes	Generated token was rejected by middleware and users were redirected to login.
BUG-003	Initial Complaint Feed Could Not Fetch Records	Medium	Fixed	1. Open the initial complaint feed page. 2. Refresh the page multiple times. 3. Check network response.	Obidit	14th December 2025	15th December 2025	Feed should fetch and render submitted complaints reliably	API returned empty or failed responses and feed remained blank.
BUG-004	Initial Image Detection Pipeline Failed to Classify Uploaded Image	High	Fixed	1. Submit a complaint with a supported image. 2. Wait for AI classification result. 3. Check AI response payload.	Mishkat	14th December 2025	16th December 2025	Initial AI model should return at least one valid issue class for supported images	Inference completed without usable class output due to preprocessing mismatch.
BUG-005	Complaint Feed Upvote Count Did Not Persist on Refresh	High	Fixed	1. Open complaint feed and upvote an item. 2. Refresh the page. 3. Compare vote count before and after refresh.	Obidit	26th December 2025	28th December 2025	Upvote state and count should persist after reload	Upvote increment appeared in UI but was not committed consistently to storage.
BUG-006	AI Recommendation Generated Irrelevant Authority and Title	High	Fixed	1. Submit complaint text and image for recommendation. 2. Review suggested authority and generated title. 3. Compare with complaint category.	Saba	27th December 2025	29th December 2025	Recommendation engine should return context-appropriate authority title and description	Suggestions were generic and mapped to unrelated authorities.

Bug ID	Title	Difficulty	Status	Reproduction Steps	Assigned To	Reporting Date	Fix Date	Expected Outcome	Actual Outcome
BUG-007	Three-Step Complaint Form Lost User Input Between Steps	High	Fixed	1. Fill step 1 and step 2 of complaint wizard. 2. Move to step 3. 3. Navigate back to step 1.	Ridita	28th December 2025	30th December 2025	Form data should persist while moving between steps	Previously entered values were reset when navigating backward.
BUG-008	Authority and Admin UI Flow Exposed Incorrect Action Buttons	Medium	Fixed	1. Log in as authority user. 2. Open complaint action panel. 3. Verify available controls.	Maisha	29th December 2025	30th December 2025	Role-based UI should show only permitted actions for that role	Citizen or admin-only actions were visible for authority accounts.
BUG-009	Cross-Role Notification State Was Not Persistent	High	Fixed	1. Update complaint status from authority panel. 2. Log in as citizen and admin in separate sessions. 3. Check notification history.	Maisha	23rd January 2026	24th January 2026	Notification events should remain visible and consistent across intended roles	Notifications appeared in one role but disappeared or never synced for others.
BUG-010	Duplicate Report Detection Failed for Similar Submissions	Medium	Fixed	1. Submit two complaints with similar content and nearby location. 2. Run duplicate detection workflow. 3. Inspect duplicate flag.	Ridita	24th January 2026	26th January 2026	System should identify probable duplicates using content and location signals	Similarity threshold was too strict and duplicate reports passed as unique.
BUG-011	Appeal and Rating Submission Created Duplicate Entries	Medium	Fixed	1. Open resolved complaint appeal/rate page. 2. Click submit multiple times quickly. 3. Review stored appeal/rating records.	Maisha	24th January 2026	26th January 2026	One user action should create exactly one appeal or rating entry	Multiple records were inserted because duplicate requests were not deduplicated.
BUG-012	Authority Map View Plotted Complaints at Incorrect Coordinates	High	Fixed	1. Open authority map view with mixed complaint data. 2. Select complaints with saved GPS data. 3. Compare plotted points with stored coordinates.	Mounota	25th January 2026	27th January 2026	Map markers should align with recorded complaint coordinates	Markers were offset due to latitude and longitude parsing inconsistency.

Bug ID	Title	Difficulty	Status	Reproduction Steps	Assigned To	Reporting Date	Fix Date	Expected Outcome	Actual Outcome
BUG-013	Complaint Report Summary Missed Latest Status Updates	Medium	Fixed	1. Resolve multiple complaints. 2. Generate complaint report from dashboard. 3. Compare report counts with database totals.	Mounota	25th January 2026	28th January 2026	Generated report should include latest complaint states and counts	Report snapshot used stale data cache and underreported resolved items.
BUG-014	Authority Recommendation Engine Selected Low-Confidence Department	High	Fixed	1. Submit complaint with clear category signals. 2. Accept authority recommendation. 3. Verify assignment queue destination.	Saba	25th January 2026	27th January 2026	Recommendation should prioritize highest-confidence relevant authority	Routing selected lower-confidence department and delayed resolution flow.
BUG-015	Admin Appeal Queue Did Not Refresh After Decision	Medium	Fixed	1. Approve or reject an appeal in admin panel. 2. Stay on queue screen. 3. Observe queue list without full reload.	Obidit	25th January 2026	26th January 2026	Queue should update immediately after appeal decision	Handled appeals remained visible until manual refresh.
BUG-016	Advanced Image Detection Misclassified Night-Time Road Damage	High	Fixed	1. Upload a low-light road damage image. 2. Run advanced image detection. 3. Compare predicted class with visible issue.	Mishkat	25th January 2026	27th January 2026	Model should maintain acceptable accuracy under varied lighting conditions	Night-time images were misclassified due to weak low-light normalization.
BUG-017	Category Sorting and Rating Order Produced Inconsistent Results	High	Fixed	1. Apply category filter in complaint feed. 2. Sort by rating and then by newest. 3. Compare order after refresh.	Saba	10th February 2026	14th February 2026	Sorting should remain deterministic and respect selected rule order	List ordering shifted unpredictably because mixed sort keys were applied.
BUG-018	Department-Wise Complaint Fetching Leaked Other Department Tickets	High	Fixed	1. Log in as authority user from one department. 2. Open department-specific complaint list. 3. Inspect returned complaint departments.	Mounota	11th February 2026	13th February 2026	Authority users should only see complaints for their assigned department	Query filter was incomplete and returned cross-department complaints.

Bug ID	Title	Difficulty	Status	Reproduction Steps	Assigned To	Reporting Date	Fix Date	Expected Outcome	Actual Outcome
BUG-019	Add Evidence Upload Failed for Valid Large Images	Medium	Fixed	1. Open add evidence on an active complaint. 2. Upload a valid high-resolution image. 3. Submit and monitor response.	Ridita	11th February 2026	13th February 2026	Valid evidence images within configured limits should upload successfully	Request timed out because upload handling did not stream large files correctly.
BUG-020	Authority Analytics PDF Export Truncated Long Text Fields	Medium	Fixed	1. Generate authority analytics PDF with long complaint titles. 2. Open the exported file. 3. Review layout in table columns.	Maisha	13th February 2026	15th February 2026	PDF output should wrap long values and preserve readability	Long text overflowed table cells and clipped important report details.
BUG-021	Banned Users Retained Access with Previously Issued Session Token	High	Fixed	1. Ban an active abusive user from admin console. 2. Keep existing session active on banned account. 3. Access complaint feed endpoints.	Obidit	14th February 2026	16th February 2026	Banned accounts should be denied API access immediately	Previously issued token remained valid until natural expiration.
BUG-022	Multiple Issue Detection Stored Only One Class per Image	High	Fixed	1. Upload an image containing more than one visible issue. 2. Trigger multi-issue detection. 3. Inspect saved issue list.	Mishkat	14th February 2026	16th February 2026	System should store all issue classes above confidence threshold	Only top-scoring class was persisted and additional issues were dropped.
BUG-023	Offline Draft Synchronization Created Duplicate Complaints	Medium	Fixed	1. Create and save a complaint draft while offline. 2. Reconnect network and submit draft. 3. Retry once during sync delay.	Ridita	1st March 2026	3rd March 2026	One draft should result in one complaint after reconnection	Retry flow created duplicate complaint records before sync lock was applied.
BUG-024	Email OTP Expired Prematurely in Redesigned Pre-Login Flow	High	Fixed	1. Register a new account from pre-login flow. 2. Enter received OTP within valid window. 3. Attempt verification.	Mounota	7th March 2026	9th March 2026	OTP should remain valid for the configured expiration period	Verification failed early due to client-server time offset in OTP expiry check.
