Life, But Making It Weird
A Gamified Hobby Social App:

GrungySync

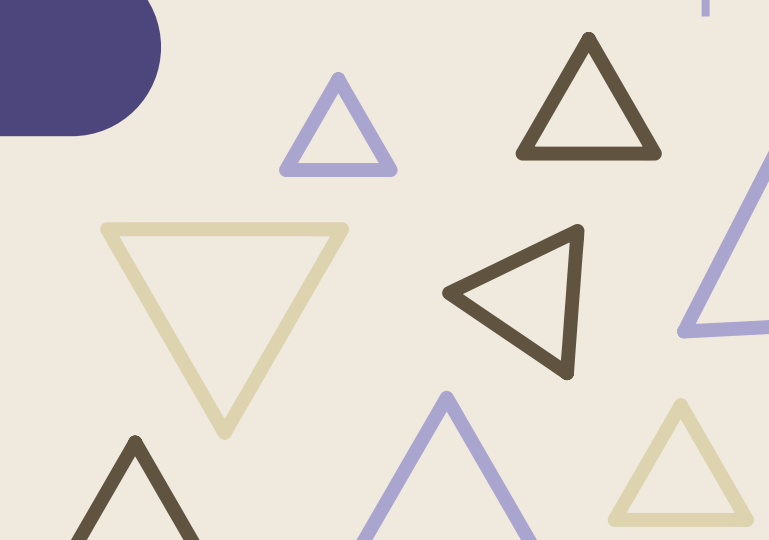

Turning lonely hobbies into over-engineered, magical social quests, by

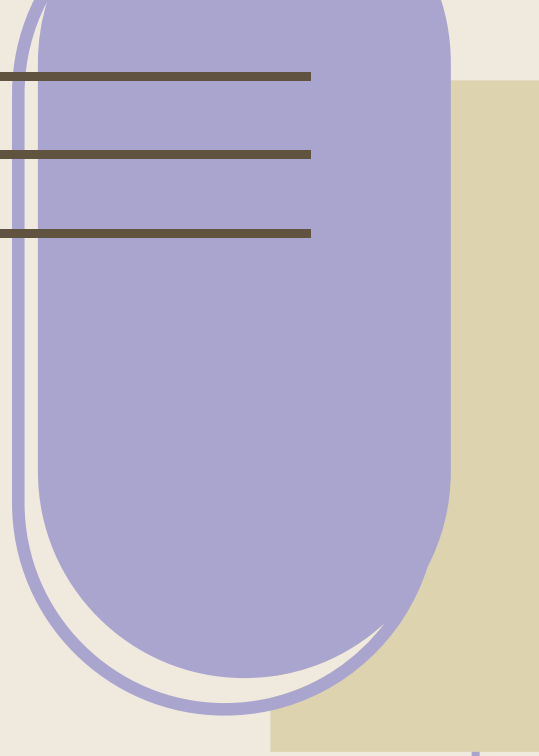

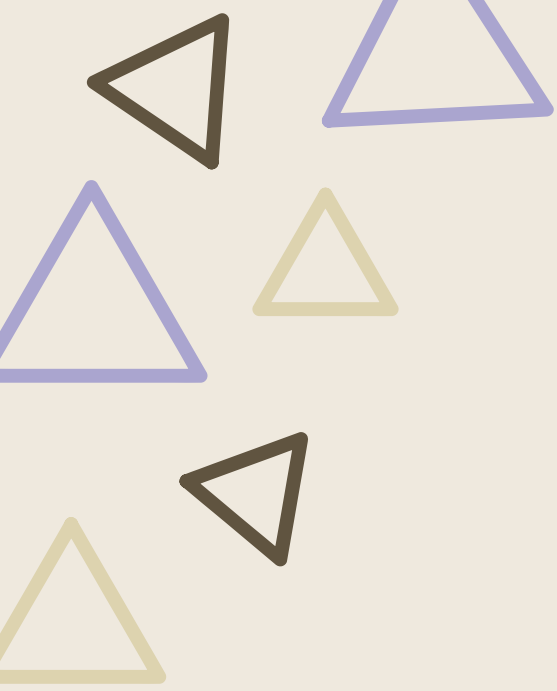

Kabir_109

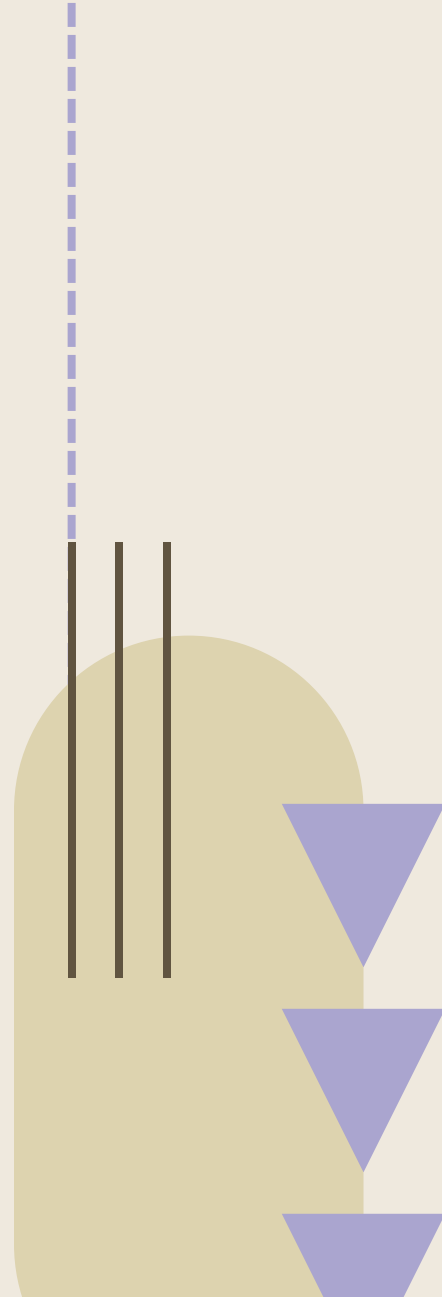

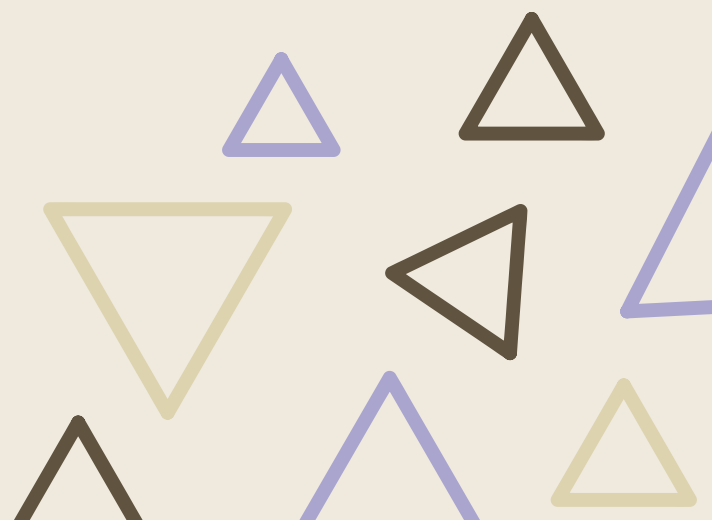

Mounota_122

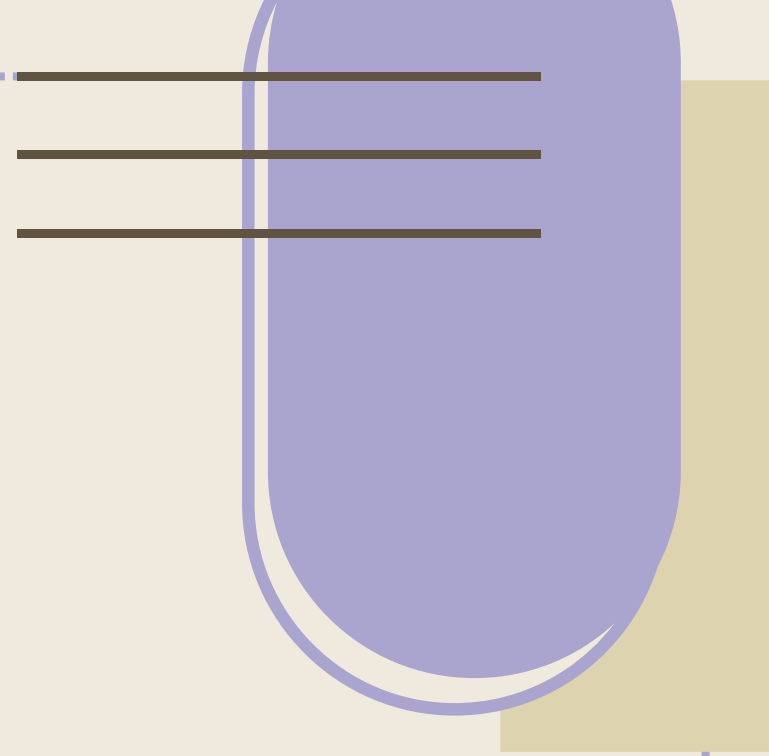

Asif_156

The Problem

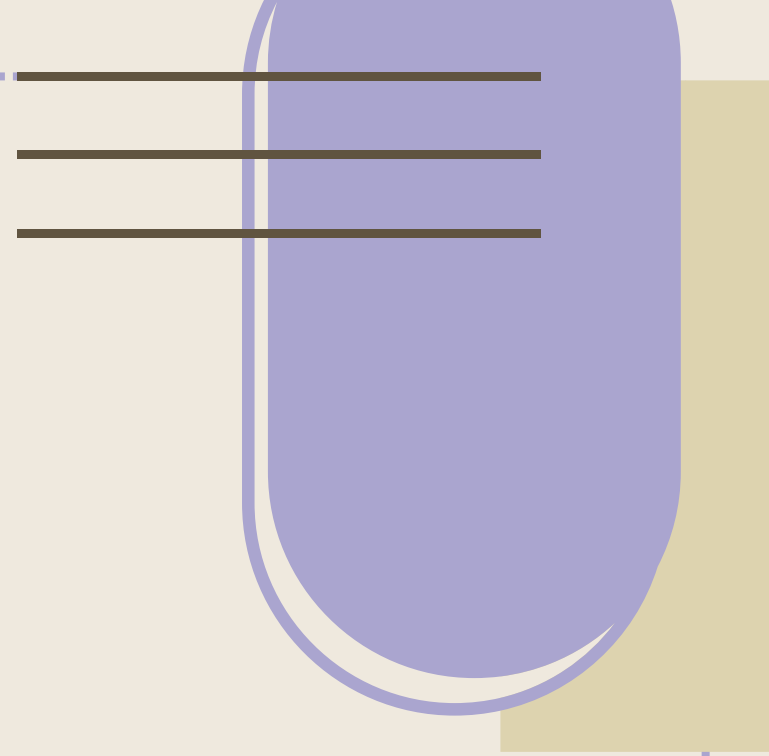

- Most hobbies are done alone, so consistency is hard & drops without feedback or recognition.
 - Personal progress feels invisible & forming lasting habits is tough this way
 - Community features for social media are weak, limiting collaboration and encouragement - for practicing hobbies specifically .
- 
- 

The Weird Twist

What if doing your hobby wasn't just
“practice”?

What if it was a quest, with XP, levels,
and a cheering crowd of people who
actually care about the same thing?

What We're Building

A social media webapp centered around hobbies with features :

- Hobby-based communities (art, music, coding, fitness, etc.) for users called **Hobbyspaces**
- Posting different things in spaces earns points/XP
- Feed curated with followed users and joined spaces content

How It Works

Points System (Not fixed yet)

Actions → Points

- Post: 10 pts / 100 chars
- Upload: +25 pts / file
- Reflect: +20
- Revision: +15 bonus

Consistency Bonus

- Weekly: +10 pts / 3 actions
- Monthly: +50 pts if ≥ 12 actions

Improvement Multiplier: $\times 1-2$ vs baseline

Daily Cap: 200 pts / hobby space

Streaks: ≥ 3 actions / 7 days, 2-day grace

Rewards

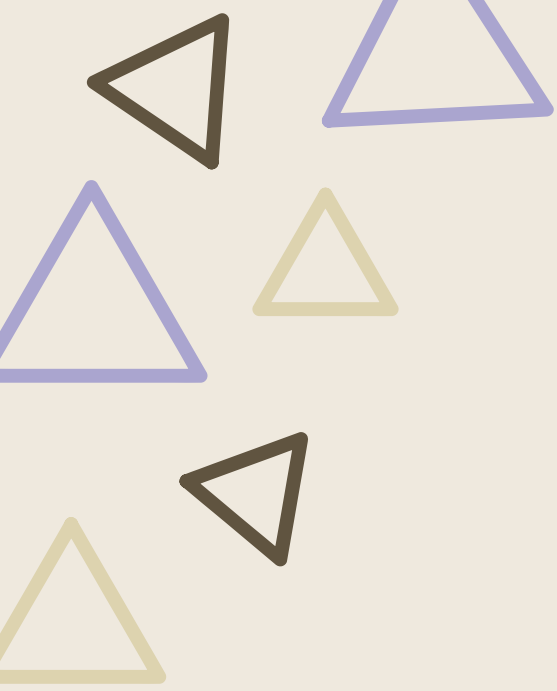

Badges for streaks, reflections, revisions

How This Fits the Theme

Our project takes a normal, sometimes boring task : practicing a hobby, and transforms it into a game-like experience.

By adding XP, levels, and community recognition, we deliberately over-engineer motivation, making everyday effort feel exciting and meaningful.

Implementing Feedback

Feedback 1 : Explanation of project alignment :
We redesigned our system to align more with the theme

Feedback 2 : Adding media file handling :
We integrated image and file upload for our website

Implementing Feedback

Feedback 3 : Wireframing:

Current Progress

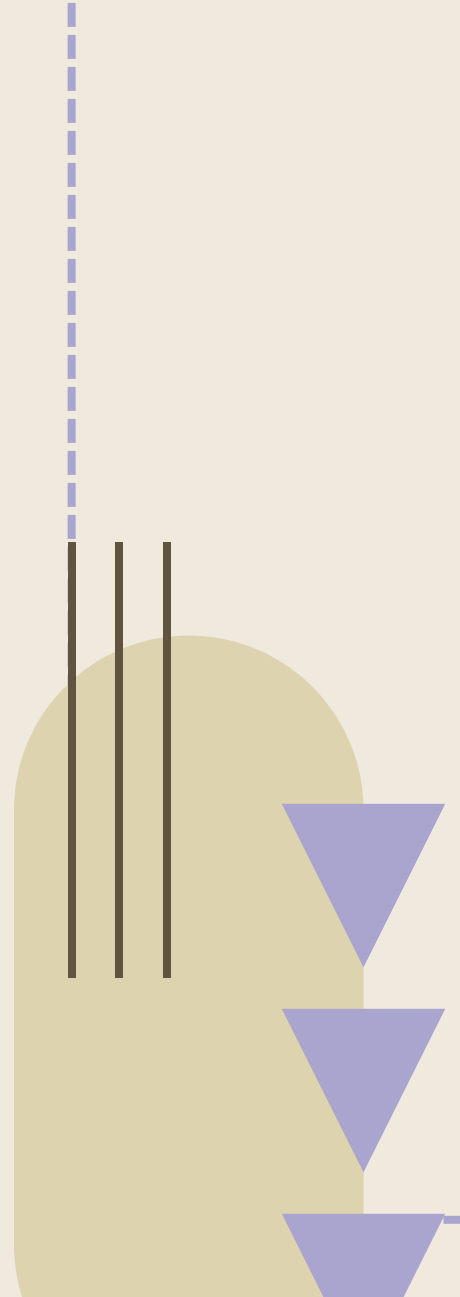

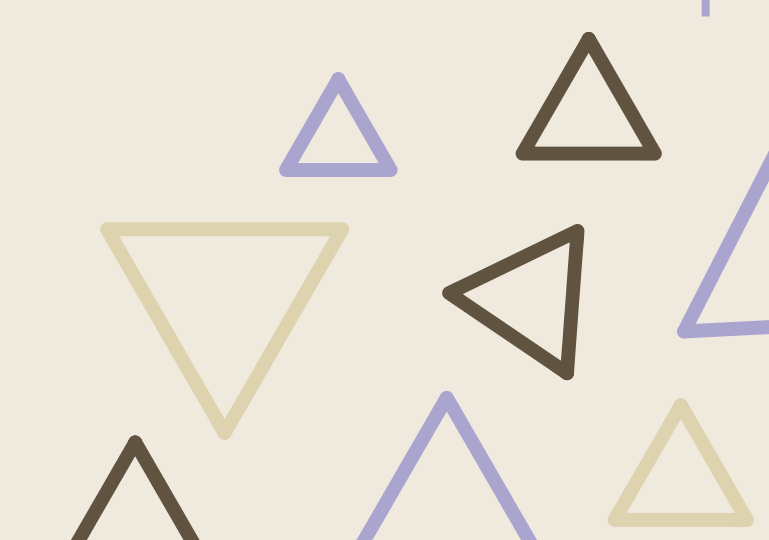

Implemented

- User authentication (login page)
 - Home page with feed
 - Profile viewing and editing
 - Hobby space creation, editing, listing, and detail views
 - Action and post creation pages with media upload
 - Points analytics dashboard
 - Search functionality
- 
- 

Current Progress

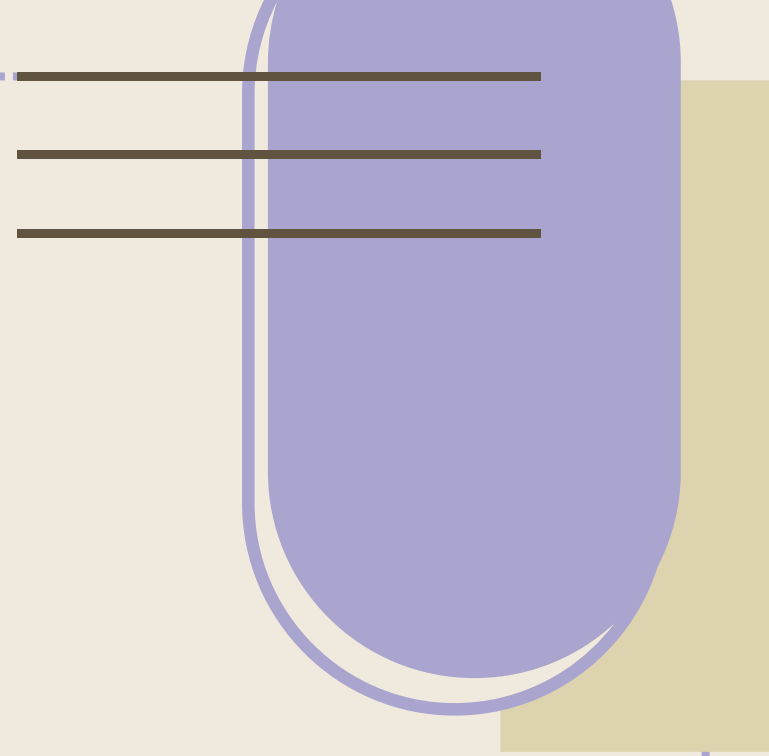

Remaining

- Badge and streak UI (visualization, grace period feedback)
 - Managing action revisions.
 - Feedback and Notifications
 - UI polishing
 - Level system
 - Leaderboard
- 
-

DEMO

Wrap-Up

Why This Matters

This project connects like-minded people,
turns lonely hobbies into shared experiences,
and proves that with a little creativity, even
the most ordinary tasks can become fun,
dramatic, and weird in the best way possible.

Thank
You

Three horizontal lines for writing a message, located within a purple rounded rectangle on the right side of the slide.
